CB

“ *The first time I saw my little boy he was just a little ball of fur curled up in a basket. He was only 5 weeks old and needed to be feed from a syringe. He chose me as his person that day. The next time I came over to my mom's he came fumbling down the stairs the way only puppies can do and kept into my arms. Snuggled into the crook of my arm and was crying tears of joy to see me. The next nearly 8 years brought me so much joy with him in my life. He perished a hero I could not have asked for a more faithful or loving companion than my little boy.*
